

TREATMENT OF FETAL REMAINS DUE TO ABORTION FORM

You have the right to decide what you would like to do with the aborted fetus.

You may decide for the provider to be responsible for disposition of the fetus.

If you are having a medication-induced abortion, you also have the right to bring the aborted fetus back to this provider for disposition after the fetus is expelled.

The provider may dispose of the aborted fetus by burial or cremation.

You can ask the provider if you want to know the specific method for disposition.

If you decide to bring the aborted fetus back to this health care facility after a medication-induced abortion, please reduce exposure to blood. This can be done by placing all remains in a sealed container and cleaning all surfaces of the container before transport.
